for this disease, I shall remark that
it is cured 1 by time - particularly by
manhood when it occurs at puberty -
& by the separation of the stife between

The Remedies for this Disease
Should be different according to its Causes.
It is because so little Attention is paid to its
causes, that the disease has so often eluded the
power of medicine, and the same medicines
have done both good & harm in unnumbered
instances.

of the Remedies which are ~~of no use~~
proper when
the Head Ach arises from ^{direct or} local causes.

From malconformation of the head it
is generally incurable. It may be palliated by
small & occasional V.S.

For Head Ach from Contusions, or falls,
the Remedies should be copious V.S. - Cupping -
poultices - cold Applications to the head & Blisters,
These Remedies often ^{soon} prevent the necessity of
using the Tepidion. Remember the intervals between the
contusions & the disease - often from 4 to 12 months.

For Head Ach from abscess in the maxillary
sinus, & decayed teeth, the Remedies should be

8 Extraction of the teeth.

When Headache arises from causes ^{ch} indirectly upon the head thro' the medium of act upon the blood vessels, then the Remedies should be suited to the specific nature of those causes. ~~A Substantiation is sought in Ham. 8th~~

If from an Epidemic fever, or a fever from any ~~acute~~ the changes in the weather, the Remedies should be accommodated to the character of the fever, ~~all the~~ ^{be chosen} Remedies should be most successful in ~~curing~~ ^{the} Remedies very useful in these cases.

If from Gout & Rheumatism, the Remedies should be such as would be used ^{in those diseases.} in ~~the~~ Blisters to Joints & great toe ^{particularly} those diseases in other parts of the body, ~~padding~~ to them more copious bleeding, also cupping and Blisters. Twice the quantity of blood should be drawn in this form of ~~headache~~ Gout & Rheumatism that would be necessary were it seated in the Joints or lungs. ~~He does this~~ It is indicated

It is from the victory that the veins
acquire over the veins at 40, or 45 that the
